01 / Activity diagram

Booking, verified test payment, paid waitlist and cancellation lifecycle

State rules

CNF / WL apply to the whole booking.
No RAC or partial passenger cancellation.
Search results are snapshots, not holds.
Each connecting leg has its own PNR.

Failure recovery

The browser callback is not authoritative.
Signatures and provider state are checked.
Webhooks / reconciliation recover interruptions.
Late captures enter the full-refund path.

Inventory safety

Run lock, then class inventory lock.
Reuse a seat only on nonoverlapping segments.
A paid WL group must fit in full.
Oldest eligible group is not bypassed.

Source: ReservationService, BookingEngine, PaymentService, ReservationJobs. Simplified activity view; individual API retries are not expanded.
